CUSTOM VERTICAL LATHE MACHINE

Our commitment to achieve constant improvement and high performances while keeping costs comparatively low, let IMT Intermato to conceive new solutions which have now become the entry models of the whole production.

ENGINEERED FOR YOU

Designed to meet uncompromising quality standards, our casting machines can be customized to respond to the requirements of the most demanding customers. They offer a highly advanced addition to the range of industrial solutions successfully produced by our company. No longer limited to their traditional application in the production of light alloy wheels, they are now also utilized in the manufacture of a range of components for the automotive industry like cylinder heads, suspension arms, bedplates, and wheel hubs.

In addition to the automotive industry, our machines find an ideal application also in the production of other products like explosion-proof boxes and industrial fittings. LPM furnaces are designed to apply to our proprietary shell the best refractory materials or crucibles in accordance with the type of furnace. With capacities ranging from 600 Kg to 2000 Kg, they can be integrated in our production lines or designed to incorporate customer requirements.
